PROFILE

A dedicated and adaptable full stack software engineer with a strong track record of overcoming challenges and excelling in problem solving. Driven by collaboration and continuous improvement, I embrace opportunities that encourage both professional and personal development, bringing a growth-focused mindset and excellent interpersonal skills to every team and project.

SKILLS

- **Frontend Development : HTML, CSS, JavaScript, TypeScript, Angular, React, Next.js, Redux, UI Design, Figma**
- **Backend Development : Java (Spring Boot), ASP.NET Core, Python, JavaScript/TypeScript (Node.js, Express), REST API, Microservices, Kafka, Software Design, OOP, SOLID Principles, Software Design Patterns**
- **Database : MySQL, Oracle SQL, MongoDB, ORM (Object-Relational Mapping)**
- **Monitoring, Logging & Observability : Grafana, Elasticsearch, Kibana**
- **Platforms & Tools : AWS, Docker, Kubernetes, Git, DevOps, Technical Writing, Problem Solving**

WORK EXPERIENCE

Software Engineer - Sitecore

IGT1 Lanka | Port City, Colombo, SriLanka | 12/2025 - Present

- Developed and maintained Sitecore-based web applications, customizing components and features to meet business and client requirements.
- Utilized **Grafana** and **Elasticsearch** (Kibana) for application monitoring, log analysis, and production issue troubleshooting.
- Supported **microservices**-based systems, analyzing logs and metrics to identify and resolve runtime and performance issues.
- Collaborated with cross-functional teams to debug production issues, improve system stability, and ensure reliable deployments.
- Contributed to improving application reliability and observability through proactive monitoring and log-based diagnostics.

Software Engineer

Central Finance Co PLC | Colombo, SriLanka | 06/2024 - 12/2025

- Contributed to the development of a **savings system** in the **financial-technology** domain using **Java, Spring Boot, Angular, and Oracle SQL**. Involved in every project phase, from gathering requirements and development to thorough testing.
- Built a **centralized integration system** to streamline **client on-boarding**, adhering to enterprise software standards.
- Optimized back-end solutions and database operations, ensuring **high performance**, data security, and integrity by leveraging **Spring Security** with advanced authentication techniques.
- Employed **FeignClient** for efficient **microservices** communication, developed reusable interfaces, and implemented Oracle SQL **stored procedures** for robust back-end data operations.
- Designed and implemented an **End-of-Day (EOD)** process for the savings project using **Spring Scheduler** and threading to ensure reliable daily operations and data integrity.
- Developed a **360° view feature** for the savings system, enabling authorized users to access T**ransaction history, Account details, Document view, and Slip printing**, with strict **role-based access control**.

Software Engineer Intern

EPIC Lanka Technology Pvt Ltd | Colombo, SriLanka | 01/2023 - 07/2023

- Built a **Credit Card Management System web application** using **Spring Boot, Angular, Hibernate, Liquibase, and MySQL**, actively participating in all phases of development from **requirement gathering and design to implementation and deployment.**
- Implemented **secure user authentication and authorization** using **JWT**, including **email verification** to safely update user credentials.
- Designed and developed user friendly interfaces, while creating and integrating **back-end APIs** to ensure smooth communication between front-end and back-end components.
- Developed **back-end logic and services** to support application features, ensuring **efficient data management and reliable system performance.**
- Implemented a **Spring Batch** solution with **Apache POI** to process and upload **Excel file** data into the database, ensuring accuracy, scalability, and efficient handling of large data sets.

PROJECTS

Eye Diseases Detection System using Computer Vision
2023 - 2024

Level 04 Research Project

- Project: The Eye Disease Detection project utilizes computer vision to identify major eye diseases through fundus and OCT images.
- Responsibilities: Focused on identifying three subtypes of cataracts using fundus images, enhancing the project's diagnostic capabilities.
- Tools & Technologies: OpenCV, TensorFlow, Python

Credit Card Management System
2023

Internship Project

- Project: Developed a Credit Card Management System web application using Spring Boot, Angular, Hibernate, Liquibase, and MySQL, covering all stages from requirement gathering and design to implementation and deployment.
- Responsibilities: Implemented secure JWT-based authentication with email verification, designed user-friendly interfaces, developed and integrated back-end APIs and services, and created a Spring Batch solution with Apache POI to efficiently process and upload Excel data, ensuring accuracy and scalability.
- Tools & Technologies: Springboot, Angular, MySql, Hibernate, Liquibase

Booking Application for Medical Centers
2021 - 2022

Level 02 Software Project

- Project: Developed a patient registration and appointment booking system for private and government hospitals, supporting patients, doctors, and medical centers with a streamlined channeling process and an intuitive user interface.
- Responsibilities: Created the medical center dashboard, implemented doctor search functionality, and enabled patients to create and manage bookings, improving overall efficiency and user experience.
- Tools & Technologies: MERN Stack, CSS, Bootstrap

Expense Tracker
2021 - 2022

Individual Project

- Built an Expense Tracker application using ASP.NET Core MVC with Syncfusion for an improved UI, allowing users to record income and expenses and view total monthly spending.
- Tools & Technologies: ASP.NET Core, Syncfusion

EDUCATION

BSc (Hons) in Information Technology - University of Moratuwa, Sri Lanka
2020 - 2024

- **Core Modules -** DSA, DBMS, Data Mining, Cluster Computing, Logic Programming, Computer Architecture.

Java Application Development using JavaSE Course - University of Colombo School of Computing
2019- 2020

- **Core Modules -** Interfaces & Packages, Exception Handling, File I/O & Streams, Multithreading, JavaFX & GUI Development.

GCE Advanced Level Examination - St.Mary's College, Matugama
2016 - 2018

- Subjects - Combined Mathematics : A, Physics : B, Chemistry: B, (Z Score : 1.5880)
- District Rank : District 84th, GCE AL 2018

ACHIEVEMENTS

- HackMoral 4.0 | Mini - Hackathon — Organized by INTECS University of Moratuwa 2022
- MoraXtreme 6.0 | Hackathon — Organized by Computer Society, IEEE Student Branch, University of Moratuwa
- MoraXtreme 7.0 | Hackathon — Organized by Computer Society, IEEE Student Branch, University of Moratuwa
- Introduction to Cloud Computing — Certification by Simplilearn

ORGANIZATIONS & VOLUNTARY WORKS

- Committee Member of IEEE Signal Processing Society — 2022 - 2023
- Head of Public Relations, Mora Hiking Club — 2021 - 2022
- Volleyball Team Player, University of Moratuwa — 2020 - 2024
